

## **THE JASMINE**

**PRICED FROM THE \$170s PLUS LOT**

For those looking for a livable one story floorplan with some added bonus space above the garage for an office or fourth bedroom, this is it. With over 1,600 sq. ft. of main floor living area, and close to 270 sq. ft. of flexible space, this Frank Betz Associates designed home has it all. A lovely covered front porch welcomes you into the house; a perfect spot for a rocking chair. The great room, with a view to the back of the home and open to the kitchen, is large enough for entertaining without being overdone. A separate dining room flows beautifully into the kitchen, making serving a breeze. The split floorplan keeps visitors and/or children on one side of the home, while you enjoy the comforts of your large master suite which features a separate tub and shower, double vanity and large walk-in closet. Add a deck or screen porch off the back of the house and you may never want to leave.

FIRST FLOOR PLAN

## **Standard Specifications as of January 1, 2010**

The following is a list of the common features in most of our homes we build. This should be used as a guide for you to gauge the quality of the features that are typical in the homes we build. Because things like lot topography and lot location can impact costs for land clearing, utilities, driveway size, foundation size, etc., final house plan pricing is derived once these items are known.

### **Permits and Survey**

- All permits for work to be performed per state and city code are included
- County and/or subdivision new home impact fees, if applicable, are not included
- As-built survey for house is included

### **Land Clearing and Excavation**

- Land clearing will be done as needed for site excavation as determined by the Builder
- Home “footprint” will be marked prior to land clearing for approval by POA

### **Water and Sewer**

- Evaluated on individual basis based on type and availability of services.

### **Foundation**

- Footings will be 10" x 20" 3,000 psi concrete with two rows of rebar
- Footing drains will be a 4" diameter perforated plastic pipe embedded in crushed stone, covered in filter fabric and laid around the perimeter of the home
- Foundation walls will be waterproofed with an asphalt-based coating. Foundation drain inside foundation
- Modular brick with rake joint for foundation walls
- SolarTec™ foundation vents, or similar
- 6 mil plastic vapor barrier in crawl space

### **Framing**

- Sills 2" x 6" pressure treated wood
- Exterior walls 2" x 4"/16" OC
- Interior walls 2" x 4"/16" OC
- Exterior wall sheathing ½" OSB
- Floor joists Engineered Georgia Pacific GPI™ floor trusses, or similar
- Sub-flooring Advantech™ ¾" T&G OSB, glued and nailed
- Roof Longleaf™ engineered roof trusses or stick built per plans

### **Roofing**

- Roof sheathing LP Tech Shield Radiant Barrier sheathing
- Shingles Timberline™ or Certain-Teed™, 30 year

### **Vents**

- Ridge vents and soffit vents for ventilation

### **Windows**

- MW™ PlyGem, double-hung low-E with grills between glass with screens. Tilt out for cleaning
- Vinyl interior and exterior

### **Exterior Doors**

- Front door – ThermaTru™ fiberglass with half leaded glass and two sidelights (space permitting)
- Fire insulated door from garage into home, per code
- All other exterior doors per plan
- Overhead Door Company 18' garage door, Banner series, insulated with glass inserts
- Hoermann™ silent drive operator, two remotes, exterior keypad

### **Siding (Varies with house plans)**

- Brick veneer on front of home with rake joint
- Nichiha™ cement board siding, 7" wood grain or smooth, ready to paint
- Shutters as shown on house plan - Buyer's choice of color
- Miratech™ cement board fascia and corner board
- James Hardie cement board soffit
- Primed finger jointed exterior 4-5/8" crown molding
- 5" Aluminum gutters and leaders

### **Insulation**

- All homes built to current Energy Star Standards
- Tyvek™ or similar house wrap applied to exterior walls as an air filtration barrier
- Energy board installed around tubs and showers for increased energy efficiency
